NORTH AMERICAN SOCIETY FOR CARDIOVASCULAR IMAGING

The 50th Anniversary
Fantastic Cases In Cardiovascular Imaging. Case 17

History: 64-year-old woman with LV mass on echo

Figure: Cardiac CTA – Slab volume-rendering 3-chamber (A) and short axis views(B)

NORTH AMERICAN SOCIETY FOR CARDIOVASCULAR IMAGING

Diagnosis: Calcified amorphous tumor of the LV

Rare non-neoplastic cardiac mass that can cause symptoms of obstruction or embolization of calcific fragments (arrow).
